940 960 980 1000 1020 1040 1060 R

A contour plot showing the level sets of a function F as a function of R . The horizontal axis is labeled R and ranges from 940 to 1060 with major ticks every 20 units. The vertical axis is labeled F and ranges from 17.25 to 19 with major ticks every 0.25 units. The plot displays several nested, roughly elliptical contour lines centered around $R = 1000$ and $F = 18$. The ellipses are elongated horizontally. The innermost contour is a small spiral, while the outermost is a large ellipse extending from approximately $R = 930$ to $R = 1010$ and $F = 17.25$ to $F = 18.9$.
