

Multiplication Mapping – How do products relate?

Name _____

Connect related boxes with arrows. On the arrow, note the arithmetic that connects the two problems. For example, an arrow from 2×8 to 4×8 would say "x2", because the answer for 4×8 would be two times bigger than the answer for 2×8 or the arrow from 3×10 to 3×9 would be labeled "-3" or from 5×8 to 6×8 "+8".
